

Building the Nuclear Workforce of Tomorrow, Today ...

Mark Your Calendars!

December 16 – 17, 2025

Join us in Nashville, Tennessee for an exciting series of events where you can connect with nuclear industry professionals and educators.

WHAT: Nuclear Industry Summit and Educators Workshop 2025

WHEN: December 16 – 17, 2025

WHERE: Vanderbilt University, Nashville, Tennessee

December 16: Nuclear Industry Summit

- This Summit is for those building or looking to build nuclear capacity over the entire fuel cycle in the U.S.
- The purpose is to discuss the future of academic and technical training needs for the nuclear industry and explore how academic partnerships can address these needs.
- Priority will be given to representatives from industry, agencies, and organizations in states actively developing nuclear energy systems.

December 17: Nuclear Educator's Workshop

- This workshop is for educators who are looking to expand their curricula offerings or learn more about the burgeoning nuclear industry within the U.S. today.
- The purpose is to increase awareness of nuclear workforce opportunities, gain foundational knowledge about nuclear missions, and learn about teaching resources available to support educational initiatives.
- Priority will be given to educators from 2-year and 4-year institutions within the Tennessee Valley Region.

Space for these events is limited, and priority will be given based on participant affiliation:

If you wish to attend both events, you may select the option to join a waitlist for the second event during registration. You will be notified by December 2 if space becomes available.
